
Info Sheet

Grignard Low Pressure CSTR

Max Pressure	Temperature Range	Working Volume
N/A	-78C-RT	250ml – 2L

Features:

- Easily scalable
- Safer to run than batch Grignard.
 - 1 single initiation at research scale can be used through production (Lower risk of startup complications/runaway reactions)
 - Allows for minimal handling of Mg
- Allows maintenance of high Mg stoichiometry throughout the reaction
